REPAIR AGREEMENT

All repairs sent to Canadian Industrial Radios & Controls will have an initial surcharge of \$120.00. This is for our technician's time in troubleshooting the issues resulting around the repair.

The surcharge will be absorbed within the repair if:

- The customer decides to move forward with the repairs. This means the \$120.00 will be applied to the total costs of the repairs. If the repair(s) total less than the initial \$120.00 surcharge, the total minimum amount for the repair will be \$120.00.

The repair surcharge will be waived if:

- The customer purchases a replacement unit or a complete new radio system, and does not move forward with the repairs. The order of the replacement unit or system must be placed at the time of the cancellation of repair. If it is not, the surcharge will be applied.
- The system is under warranty.

If you agree to the above statements and would like a transmitter, receiver or entire unit to be assessed for repairs, please sign, date and send this form along with the item(s) you require to be assessed to the address above.

Thank you.
